Become a Catalyst for Conservation

The **Conservation Impact Partner** Program invites mission-aligned organizations to support Species360's vital work in global wildlife conservation, advancing data-driven solutions that protect species, ecosystems, and the future of biodiversity.

Conservation Research

Research led by the Species360 Conservation Science Alliance led to evidence-based policy change for marine mammals.

Leading Partnerships.

Species360 *ex situ* data integrated into IUCN Red List of Threatened Species.

Global Community

Over 1,300 members representing 103 countries conserving over 26,000 species worldwide.

Join a Global Force for Wildlife

By becoming a **Conservation Impact Partner**, your organization joins a global movement reshaping the future of species conservation. Your support fuels innovation, strengthens international collaboration, and powers the essential data that drives effective, science-based conservation strategies worldwide.

Amplify Your Mission. Multiply Your Impact.

When you partner with **Species360**, your institution gains access to a powerful global platform that enhances your mission and extends your reach. Together, we can harness our collective strength to drive meaningful change, elevate awareness, and protect the world's wildlife for generations to come.

Global information
serving conservation.

Powering Global Wildlife Conservation Through Data

Species360 is a global nonprofit that empowers zoos, aquariums, and conservation programs to harness the power of data to protect and preserve wildlife. With over 1,300 member institutions in more than 100 countries, we manage the world's largest database of animal and species information through our **Zoological Information Management System (ZIMS)**.

By transforming vast datasets into actionable insights, we enable better decision-making in conservation, research, and animal care—supporting a more informed, collaborative, and effective global effort to safeguard biodiversity.

Global Data. Local Impact. Real Conservation.

As a Conservation Impact Partner, your support will help us:

- **Expand conservation research:** Contribute to projects that leverage the largest repository of wildlife data to advance species conservation efforts.
- **Innovate with technology:** Drive technological advancements that improve how we monitor, manage, and care for species, enabling better outcomes for threatened and endangered animals.
- **Support zoos, aquariums, and conservationists:** Ensure institutions worldwide have access to the tools and resources they need to care for species and preserve biodiversity.
- **Strengthen global collaboration:** Help foster a global network that shares data, resources, and best practices to accelerate conservation impact.
